Global Vincitore Practical Laravel

- **Create login** page and login functionality
- Once user logged in, **create Category** module
- Category module explanation: - Create n level category. e.g. When User enter category, it should be considered as parent category. When user create category with parent category then it should be considered as sub category. When user create category with sub category selection, it should be considered as sub sub category
- So it should be look like:
    - Main Category 1
        - Sub Category1
            - Sub Sub Category1
            - Sub Sub Category2
        - Sub Category2
            - Sub Sub Category3
            - Sub Sub Category4
    - Main Category 2
        - Sub Category1
            - Sub Sub Category1
            - Sub Sub Category2
        - Sub Category2
            - Sub Sub Category3
            - Sub Sub Category4
- Category Listing
- Category Add
- Category Edit
- Category Delete

We have 4-5 hours to complete this functionality.
